

DO YOUR OWN THRESHING.

It is a great point to be able to thresh from the shock. It saves grain and saves handling. This is sufficient to account for the growing popularity of the small or individual thresher as against the job threshing outfit with its long train of helpers to be housed and fed. Another point that argues strongly with all farmers who own small threshers is the matter of time. They thresh just when they are ready, whenever the grain is just right, when the weather is fine. Their neighbors must wait until the threshing outfit comes their way and go into the job with the weather just as it happens to be. For these reasons there is a constantly widening field for the excellent small threshers manufactured by the Belle City Manufacturing Co., of Racine Junction, Wis. This line of machinery has become so well known as hardly to need any words of commendation. Individual farmers or neighborhoods wanting to avail themselves of such advantages and such machinery cannot do better than to get in touch with the Belle City people. An advertisement will be found in this issue of our paper. A letter of inquiry to the company will bring catalogue and all particulars.

Carolina Watchman: A fearful fate is certainly in store for this country if there is not some means speedily devised to prevent the people's representatives from going into the courts and defending the blackest criminals simply because such criminals have the means and can afford to pay for such services.

If you believe in it, now is the time to get ready for it. The A. & M. College, Raleigh, N. C., offers exceptional opportunities and every effort is being made to make the work practical, helpful and educational.

The College trains and educates so that the young farmer may enjoy liberal culture and at the same time a complete practical training in his work.

If You have a farm, or will inherit one, or if you intend to be a farmer, educate yourself to farm like the lawyer educates himself to practice law. Education pays on the farm as it does elsewhere in life.

The new Agricultural Building is now being completed and equipped for work for the opening of the session, and unusual opportunities will be available for all lines in agricultural education.

Fall Term Beging September 7, 1905.

Four year and two year courses in agriculture are offered. Applicants over twenty years old are admitted without examination. A few scholarships are available. Work is provided for needy students. Write now for catalogue and illustrated circular describing the agricultural courses.

Information can be obtained by addressing the Professor of Agriculture.
C. W. BURKETT, Raleigh, N. C.
